Colourful and bizarre, chameleons are truly fascinating creatures! This book is the result of years of experience gained by the author, who has kept many species of chameleon in different countries, gaining an understanding of the problems found in both temperate and tropical environments. Although written in South Africa, where he bred all of the species discussed, this book contains a wealth of information that will be of value to all, regardless of location. Many species (such as Panther, Carpet, Jackson's, Veiled, Parson's, etc.) are discussed in detail, together with the Pygmy chameleon species such as Rieppeleon and Brookesia. There is a section on the colour morphs of Panther chameleons. Topics covered in this book include: Buying a chameleon Housing Lighting: UV, night lights, infra red, etc. Food and water, supplements, etc. Breeding Egg management Incubation Hatchlings Health problems (MBD, stress, parasites, etc.) and more... Illustrated throughout with many colour photos, the book is packed with essential information necessary for the successful care and breeding of these superb and exotic reptiles.
