Dividing the sum total of human musical achievement, from Beethoven to The Beatles, Busta Rhymes to Bach, into just six fundamental forms, Levitin illuminates, through songs of friendship, joy, comfort, knowledge, religion and love, how music has been instrumental in the evolution of language, thought and culture. And how, far from being a bit of a song and dance, music is at the core of what it means to be human. A one-time record producer, now a leading neuroscientist, Levitin has composed a catchy and startlingly ambitious narrative that weaves together Darwin and Dionne Warwick, memoir and biology, anthropology and a jukebox of anecdote to create nothing less than the ' soundtrack of civilisation' .

The world in six songs explains at least in part the evolution of music and brains over tens of thousands of years and across the six inhabited continents music i argue is not simply a distraction or a pastime but a core element of our identity as a species an activity that paved the way for more plex behaviors
