"Críticas From the team that brought us You Can, Toucan, Math, comes another fun way of looking at something many kids have trouble getting the hang of: fractions. Although there is no narrative story within the book to explain how fractions work, there are plenty of imaginative, creative approaches presented in each fraction problem.

The computer-generated artwork is very bold and bright--it not only enlivens the pages, it graphically explains the concepts within the "story problems" it accompanies. A lot of essential terminology, like "numerator" and "denominator" is explained, along with functions like comparing, multiplying, and dividing fractions. A former math teacher, Adler ably covers a lot of essential ground in one hardcover book and makes it fun. The book is sure to be quite useful for parents and teachers alike in introducing techniques for solving word problems. The reinforced library binding and heavy duty paper stock assures that it will stand up to repeated use. Reseña del editor Presents an introduction to fractions, with examples using illustrated objects and situations familiar to young readers, in order to simplify and reinforce important mathematical concepts and make them more concrete. Biografía del autor David A. Adler taught math for eight years. In that time he learned many things from his students -- including the fact that they thought fractions were hard. So he decided to prove that learning how to work with fractions is not only easy, but also fun! He lives with his family on Long Island. You can learn more about him at [www.davidaadler.com](http://www.davidaadler.com). Edward Miller loves to make concepts clear to kids and has demonstrated that in his previous nonfiction books. School Library Journal praised his *Alphabeep: A Zipping, Zooming ABC* by Debora Pearson as "stunningly illustrated." He lives in New York City.
