"Synopsis This skilfully researched book focuses on how a small socio-political American elite seeks to establish its control over the very basis of human survival, the provision of our daily bread. 'Control the food and you control the people'. This is no ordinary book about the perils of GMO. Engdahl takes the reader inside the corridors of power, into the backrooms of the science labs, behind closed doors in the corporate boardrooms. The author reveals a World of profit-driven political intrigue, government corruption and coercion, where genetic manipulation and the patenting of life forms are used to gain world-wide control over food production. The book is an eye-opener, a must-read for all those committed to the causes of social justice and World peace. Klappentext What is so frightening about Engdahl's vision of the world is that it is so real. Although our civilization has been built on humanistic ideals, in this new age of 'free markets', everything-- science, commerce, agriculture and even seeds-- have

become weapons in the hands of a few global corporation barons and their political fellow travelers. To achieve world domination, they no longer rely on bayonet-wielding soldiers. All they need is to control food production. (Dr. Arpad Pusztai, biochemist, formerly of the Rowett Research Institute Institute, Scotland) If you want to learn about the socio-political agenda --why biotech corporations insist on spreading GMO seeds around the World-- you should read this carefully researched book. You will learn how these corporations want to achieve control over all mankind, and why we must resist... (Marijan Jost, Professor of Genetics, Krizevci, Croatia) The book reads like a murder mystery of an incredible dimension, in which four giant Anglo-American agribusiness conglomerates have no hesitation to use GMO to gain control over our very means of subsistence... (Anton Moser, Professor of Biotechnology, Graz, Austria). Alle Produktbeschreibungen"
