In the end, you will categorically discover a extra knowledge and deed by using up additional finances.

"Reseña del editor Here is the story about this book. When I first began playing (about 40-50 years ago) the idea of winning the game by purposely dogging a shot or two was considered cowardly and the shooter was a yellow-bellied weakling, deserving of sneers and insults. That was then, this is now. A well-played safety is applauded!! And this is why this book was written. This is an accumulation of over 20 years of study and analysis of defensive and safety shooting options. Players of tournaments and league matches were analyzed. These are advanced defensive strategies and tactical tools used by professionals, road players, and hustlers. Just reading this material will improve your winning percentage by 10%. YES ? practice with the exercises is critical. This is the only way to can leave your opponent with a dangerous and deadly table. The book is a series of lessons in how to trick and trap your opponent into helping you win. And, by the way, makes winning even more fun!! If you prefer a PDF version of the book - check out the Billiards Gods blog."
