"Reseña del editor Complications that arise during childbirth remain a significant challenge for all healthcare providers. Obstetric Interventions is a richly detailed text that combines traditional obstetrics with the use of innovative birthing techniques. With clear, state-of-the-art color illustrations throughout - all originally produced for this text - this book gives clear insight into the mechanisms of normal childbirth and the alternative techniques of obstetric intervention that may need to be used in the delivery room. In addition to being highly illustrated, the book is accompanied by over fifty animated simulations of obstetric interventions that are available online. These highlight the different birth mechanisms in truly unique detail and will aid understanding of anatomy and technique. Obstetric Interventions is aimed at obstetricians, obstetric trainees, and midwives. This book provides an evidence-based insight into the choices that obstetricians and midwives face every day at all stages of the birthing process. Descripción del libro Obstetric Interventions is a richly detailed text which targets the challenges that doctors and obstetricians face when complications arise during childbirth. In addition to clear, state-of-the-art color illustrations throughout, the text also features online access to over fifty video simulations of obstetric interventions in 3-dimensional realism. Biografía del autor P. Joep Dörr was a Gynaecologist at HMC Haaglanden Medical Centre and Professor of Postgraduate Medical Training at the Leiden University Medical Centre. He was driven by a passion for educating obstetrics

practitioners and modernizing their training. He initiated this book to provide visual insights into obstetric interventions to practitioners around the world. Vincent M. Khouw, founder of VMK Designs, holds an M.Sc. in Industrial Design Engineering from Delft University of Technology, the Netherlands. As a designer, he has used computer-aided techniques extensively in his work to produce 3-dimensional, insightful illustrations for this book. Frank A. Chervenak, M.D. currently serves as the Given Foundation Professor and Chairman of the Department of Obstetrics and Gynecology, as well as Obstetrician and Gynecologist-in-Chief and the Director of Maternal Fetal Medicine at the NewYork-Presbyterian Hospital, Weill Cornell Medical College, New York. Amos Grunebaum serves as Chief of Obstetrics at NewYork-Presbyterian Hospital and is a Professor at Weill Cornell Medical College, New York. Yves Jacquemyn has published over 200 papers in the areas of Obstetrics and Gynecology, and founded the first Flemish training course in obstetric interventions, which is now compulsory for all Flemish practitioners."
