"Insightful commentary on the tangible relics of the Third Reich . . . Tells the history of the Nazi regime from a fascinating new perspective" (Military History Monthly). Hitler's Third Reich is covered in countless books and films: no conflict of the twentieth century has prompted such interest or such a body of literature. Here, two leading World War II historians offer a new way to look at the subject—through objects that come from this time and place, much like a museum exhibit. The photographs gathered by the authors represent subjects including the methamphetamine known as Pervitin, Hitler's Mercedes, jackboots, concentration camp badges, a 1932 election poster, Wehrmacht mittens, Hitler's grooming kit, the Tiger Tank, fragments of

flak, and, of course, the swastika and Mein Kampf, among dozens more—along with informative text that sheds new light on both the objects themselves and the history they represent.
