Colour in art - as in life - is both inspiring and uplifting, but where does it come from? How have artists found new hues, and how have

these influenced their work? Beginning with the ancients - when just a handful of pigments made up the artist's palette - and charting the discoveries and developments that have led to the many splendoured rainbow of modern paints, Bright Earth brings the story of colour spectacularly alive. Packed with anecdotes about lucky accidents and hapless misfortunes in the quests for new colours, it provides an entertaining and fascinating new perspective on the science of art.

Philip Ball is a writer most of his books are concerned with science in some form or another its history its interactions with the arts and society its achievements delights and detours he is a regular columnist for several magazines and an occasional radio presenter and broadcaster
