"Pressestimmen 'Against all-too-human accounts of the Anthropocene, Jamie Lorimer envisions a dynamic cosmopolitics for wildlife. He demonstrates how species 'conservation' can somehow proceed as neither mastery nor naturalism but, instead, as necessary experiments in interspecies responsibility.'--Stacy Alaimo, author of *Bodily Natures: Science, Environment, and the Material Self*'Jamie Lorimer has written a very provocative and relevant book about the future of conservation.'--CHOICE'An enlightening and very readable introduction to some key concepts.'--Human Geography'An important book for anyone engaged in conservation.'--Quarterly Review of Biology Über den Autor und weitere Mitwirkende Jamie Lorimer is associate professor of geography and the environment at Oxford University."

In wildlife in the anthropocene jamie lorimer argues that the idea of nature as a pure and timeless place characterized by the absence of humans has e to an end but life goes on wildlife inhabits everywhere and is on the move lorimer proposes the concept of wildlife as a replacement for nature

By coining and for the first time fully exploring the concept of anthropocene feminism it highlights the alternatives feminism and queer theory can offer for thinking about the anthropocene feminist theory has long been concerned with the anthropogenic impact of humans particularly men on nature.

In wildlife in the anthropocene jamie lorimer argues that the idea of nature as a pure and timeless place characterized by the absence of humans has e to an end but life goes on wildlife inhabits everywhere and is on the move lorimer proposes the concept of wildlife as a replacement for nature

Wildlife in the anthropocene conservation after nature jamie lorimer elephants rarely breed in captivity and are not considered domesticated yet they interact with people regularly and adapt to various environments. Among my favorites so far is jamie lorimer s wildlife in the anthropocene conservation after nature a professor of human geography lorimer redefines conservation as a forward looking and dynamic practice. As a crisis discipline conservation biology takes a toll on its first responders routinely confronting us with accelerating extinctions and a society increasingly detached from wildlife and nature acknowledging humanity s finite future and championing our beloved groups and places affords a reassurance that our individual actions matter.

Wildlife conservation that is without implying that conservation work is simply a matter of practical hands on execution of government policy in which theory has little or no role to play i could not help but ask whether the attractive theoretical terms 1 banting wildlife in the anthropocene conservation after nature by jamie lorimer
