"Pressestimmen 'Entangled may be Ian Hodder's most theoretically ecumenical book to date. The discussion of the various current approaches being used in archaeology, anthropology, and many other disciplines makes this an extremely valuable work . . . 'Hodder has written a tremendously useful addition to the literature on the relationship of people and things that deserves close reading.' (Current Anthropology, 1 August 2013) 'Ian Hodder has written an extremely interesting, rigorously argued and intellectually adventurous book about the nature of things. . . Readers working across the social sciences and humanities, and particularly those working at the intersection of the physical and human sciences, will find the messy openness of Hodder's book vibrant and compelling.' (Critical Quarterly, 2 July 2013) 'Summing Up: Recommended. Graduate students, faculty, professionals.' (Choice, 1 May 2013) Rezension 'The quantity and diversity of Hodder's readings are simply astonishing. His new conception of material entanglements is going to change the way archaeologists understand their field.'- Norman Yoffee, University of Michigan 'Entangled is nothing less than a reframing of archaeological enquiry into things. It is a fundamental, first-principles rethinking of how archaeologists should understand the world around them.'- Matthew H. Johnson, Northwestern University 'This book is a provocative and exciting contribution to archaeological theory and beyond. Its central thesis is that entanglement is both a condition of being in the world and a process of linking entities together in networks or assemblages. In charting a course across material, social, and evolutionary domains, it provides a novel way of bridging the Great Divide between the social and natural sciences.'- Bob Preucel, University of Pennsylvania Alle Produktbeschreibungen"
