Un vecteur est le support de transmission d'un agent infectieux d'un humain à l'autre. C'est l'arme la plus redoutable. Les terroristes le savent. Les experts ne se demandent pas si un attentat à l'arme biologique sera un jour perpétré aux États-Unis ou ailleurs dans le monde, mais quand... Après Chromosome 6, Robin Cook, le maître du thriller médical, nous entraîne dans les arcanes d'une machination diabolique qui s'enracine dans la technologie biologique la plus moderne. Si Vector n'est qu'une fiction, elle ressemble étrangement à la réalité. Et le pire est toujours plausible.

The vector product is written in the form  $\mathbf{a} \times \mathbf{b}$  and is usually called the cross product of two vectors In this case we are multiplying the vectors and instead of getting a scalar quantity we will get a vector quantity This is the trickiest of the vector operations we'll be dealing with as it is not commutative and involves the use of the dreaded right hand rule which I will get to.

**In mathematics and physics a vector is an element of a vector space. For many specific vector spaces the vectors have received specific names which are listed below. Historically vectors were introduced in geometry and physics typically in mechanics before the formalization of the concept of vector space. Therefore one talks often of vectors without specifying the vector space to which**

The essence of cell chemistry is to isolate a particular cellular component and then analyze its chemical structure and activity. In the case of DNA this is feasible for relatively short molecules such as the genomes of small viruses. But genomes of even the simplest cells are much too large to directly analyze in detail at the molecular level.

This is a specialized version of vector which is used for elements of type bool and optimizes for space. It behaves like the unspecialized version of vector with the following changes: The storage is not necessarily an array of bool values but the library implementation may optimize storage so that each value is stored in a single bit. Elements are not constructed using the allocator.
