"Über den Autor und weitere Mitwirkende The author was educated in Victoria, B.C., Canada and Oxford, England, obtained a B.Sc., and M.Sc., degree from the University of Victoria and a Doctor of Philosophy (D.Phil.) degree from Oxford University in England (Wolfson College). After these studies were completed he chose to return to Canada. After two years as a research fellow in Ottawa he returned to Victoria where he currently lives with his wife and his two children. A fondness for England continues and he returns to England on a regular basis. He has published and lectured on a broad array of topics including psychometrics, pattern recognition, visual perception, knowledge acquisition, artificial intelligence, laboratory medicine and cancer research. The author serves on the Board of Directors of companies in Canada and England."

**Nature s defence against cancer claims can t be made to say salvestrols may cure cancer as without clinical trials this can t be proven the reason they should ideally be anic is because plants produce salvestrols during growth to protect against fungus however if fungicides have been sprayed on the plants then the plants don**

Salvestrols are a new class of natural pounds that have a pharmacological definition rather than a chemical definition they are defined by the action of the metabolites produced when they are

metabolised by the cyp1b1 enzyme in cancer cells. The key feature of salvestrols is that they are activated only inside the cancer cells which they arrest or kill the anticancer effects are due not to the plant chemicals themselves but to what they turn into within the cancer cells triggered by the presence of a specific enzyme salvestrols are nature s defence against attack.
