Many lives are lost in the mayhem, but when one lady of the night is found murdered with brutal incisions and no sign of a struggle, it is clear something is amiss. Madeleine Karno must ask herself the terrifying question: Do they have their very own Jack the Ripper in France? Madeleine is no stranger to cases such as this. Though she is a woman in forensic pathology (a career considered unseemly even for men), her recent work with a string of mysterious deaths and becoming the first female student admitted to the University of Varbroug has earned her some semblance of respect. But there?s only so much her physiology courses can do to help her uncover the mysteries of a mad scientist?s brutal murders. Madeleine must do whatever it takes?investigate the darkest corners of the city and even work undercover?to track down a murderer at large. But if there?s one thing the press has right about ?Mademoiselle Death,? it?s this: it takes a woman to find a killer of women.
